

TEMPO t32 chair

design Timo Saarnio

The light and clearly shaped Tempo t32 chair suits well to different spaces and needs. Thanks to its strong frame structure it can be used in spaces where interior has to be easily transformed to different functions as restaurants, cafés and congress centers. The frame of Tempo t32 chair has been formed from a 10x10 mm steel wire. The slim frame enables an efficient stacking of the chairs. In this way Tempo t32 chair saves space when stacked, and a chair trolley improves the space saving.

Tempo t32 chair has a tiny and hardly noticeable row connector which makes it possible to use the chair in multi purpose halls linked together. Thanks to chairs small size it can easily be stored e.g. under the stage efficiently.

For an easy handling of the Tempo t32 chair a grabbing hole is available in the backrest of the chair.
